

Autism SA Presents

# LEGO® CLUB Junior for ages 4-6 years

*A school holiday program based on the principles of LEGO® based therapy*

## WHAT IS LEGO® CLUB?

Based on the principles of LEGO®-Based Therapy, LEGO® Club is a structured programme, whereby participants adopt a distinct role then work as a team, following step-by-step visual instructions, to complete a LEGO® creation. LEGO® Club supports skill development in a range of areas, including speech, language, communication, social, interaction, teamwork, turn-taking, listening, problem solving, fine motor, categorising, decision making, visual discrimination, questioning, self-esteem, emotional regulation... and it's fun!

LEGO® Club Junior is a version of LEGO® Club specifically adapted to meet the needs of children aged 4-6yrs.

The programme consists of 90 minute sessions at our Lockleys site. It is advisable that participants attend a minimum of 3 sessions to optimise progress towards goals, though attendance at 1-2 sessions can be considered.
