

# Field River Restoration Project Community Planting Day

## *Resilient Urban Rivers – Join us for a free Community Planting Day*

You're invited to join us for a Community Planting Day along the Field River. This event is part of Greening Australia's Nature in Cities program, which aims to engage and collaborate with communities. Working together with the Kaurna People, Green Adelaide, City of Marion, Nature's Own and the local community, we will be planting local native species along the river to supplement the Yellow-tailed Black-Cockatoos diet and help create a more resilient, biodiverse habitat. This partnership is supporting the Field River project to deliver habitat and connectivity for native flora and fauna, improve water quality outcomes along the catchment, and reconnect people with nature.

Join us for a day of tree planting and other activities:

- Kaurna cultural knowledge sharing
- Free BBQ and coffee available

### Event details

**When:** Sunday, 12<sup>th</sup> June 2022, 10:00am – 2:00pm

**Where:** Barton Drive Reserve, Trott Park

Parking available along Barton Drive
